## **DETAILED ACTION**

### ***Inventorship***

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 3747

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 35-38, 42, and 43 are rejected under 35 U.S.C. 102(e) as being anticipated by Bradshaw (US 6,328,014 B1).

Regarding to claim 35, the reference of Bradshaw teaches the control method which including the following subject matters: an internal combustion engine, installed in a vehicle, comprising:

- an electronic controller;

- a fuel system operatively connected with said electronic controller and introducing fuel into cylinders of said internal combustion engine in response to fuel delivery command signals produced by said electronic controller (col. 2, lines 1-28);

- an engine speed sensor operatively connected with said electronic controller (col. 2, line 55 through col. 3, line 16);

- at least one vehicle parameter sensor (as above discussions);

wherein said electronic controller determines that said engine is running in a no load condition at least in response to a signal from said vehicle parameter sensor, and responsively stores a value representative of fuel delivered to the engine cylinders and a value representative of engine speed (above discussions; and col. 3, line 17 through col. 4, line 47).

Regarding to claims 36-38 (as discussed in claim 35).

Regarding to claims 42, and 43 (as above discussions).

Art Unit: 3747

***Allowable Subject Matter***

4. Claims 1-34 are allowed.

5. Claims 39-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***
